Objective

Electrical Maintenance Technician with hands-on experience in preventive and corrective maintenance. Skilled in electrical systems, troubleshooting, and motorcycle service, with additional experience in retail operations. Detail-oriented, adaptable, and able to work both independently and in a team.

Experience

- Internship | PT Optima Sinergy Convestama** July 2025 - December 2025
Electrical Maintenance
 - Performed preventive and corrective maintenance on electrical systems and equipment, including panels, motors, and control circuits
 - Conducted routine inspections, troubleshooting, and repairs to minimize downtime and improve operational efficiency
 - Interpreted electrical diagrams and handled wiring, component replacement, and system installation
 - Supported commissioning activities and ensured compliance with safety standards
 - Collaborated with the maintenance team to maintain reliable production operations
- Work | PT Sumber Alfaria Trijaya Tbk** January 2021 - January 2022
Crew Store
 - Provided customer service by assisting with product inquiries and purchases
 - Handled cashier transactions accurately and efficiently
 - Maintained product displays, stock availability, and store cleanliness
 - Supported inventory control processes and daily store operations
 - Worked with team members to achieve sales targets
- Internship | AHASS Motor Cahaya Utama** January 2020 - June 2020
Mechanic
 - Performed maintenance and repair services on Honda motorcycles according to AHASS standards engine diagnostics and troubleshooting for mechanical and electrical issues
 - Conducted Replaced components and ensured optimal vehicle performance
 - Used diagnostic tools and maintained service quality
 - Handled customer complaints professionally and ensured timely service completion

Education

- Politeknik Negeri Semarang** 2023 - 2026
D3 Teknik Elektronika
- SMKN 4 Semarang** 2019 - 2022
Teknik Bisnis Sepeda Motor

Skills

- Electrical maintenance & troubleshooting (panels, wiring, basic control systems)
- Preventive & corrective maintenance
- Motorcycle service & diagnostics (Honda standard)
- Hand tools & diagnostic equipment operation
- Inventory handling & stock management.
- Cash handling & POS operation
- Customer service & communication
- Problem-solving & analytical thinking
- Teamwork & adaptability
- Time management & work efficiency
- English language

Projects

- Radar system

Arduino-Based Radar System with Ultrasonic Sensor

Designed and developed a simple radar system using Arduino and an HC-SR04 ultrasonic sensor to detect object distance and movement within a monitoring area. The system measures ultrasonic wave reflections and displays real-time detection results through a visual interface. Responsibilities included electronic circuit design, microcontroller programming, sensor calibration, and distance accuracy testing.

- **Raspberry pi trainer kit**

Raspberry Pi Trainer Kit Development

Designed and assembled a Raspberry Pi-based trainer kit for learning and experimentation in embedded systems and IoT applications. The trainer kit integrates multiple input and output components such as LEDs, sensors, buttons, displays, and communication modules to support hands-on practice and system prototyping. Responsibilities included hardware wiring, module integration, system testing, and Python-based programming on Raspberry Pi Foundation platforms.
